

A08001 Avro Lancaster B.II

Due to shortage of Rolls-Royce Merlin engines, some 300 Lancasters were built with Bristol Hercules radial engines, becoming the BII Variant. Some were also fitted with enlarged bomb-bay doors to enable large 8000lb bombs to be carried, as well as a ventral defensive turret..

Technical specs	
Item scale	1:72
Item length - without packaging	29.3 cm
Item height - without packaging	8.68 cm
Item width - without packaging	43.1 cm
Finish	Plastic
Number of scheme options	2
Wingspan	431 mm
Skill level	2

Frederika Village, 658 Frederika street, Gezina, Pretoria
